

UCR Help – Registration

Prior to submitting monthly MoUCR reports to the central repository through the internet, each agency must first register for a new account and receive permission to enter the website. An agency may request more than one individual be authorized to access and enter that agency's data; but each individual must register through the MoUCR Program Office.

For information on creating a new account, see “Registering for a New Account.”

For information on changing an existing account, see “Updating an Existing Account.”
